
ERRATUM

ERRATUM FOR *Xyris* (XYRIDACEAE) FROM THE PLANALTO OF BRAZIL

There has been oversight in regard to disposition and location of holotype material of *Xyris* species treated in R. Kral & M. G. L. Wanderley's (1988), "Ten novelties in *Xyris* (Xyridaceae) from the Planalto of Brazil" (Ann. Missouri Bot. Gard. 75: 352-372). The holotypes of five [*X. sceptrifera* Kral & Wanderley (*Irwin et al.* 13410); *X. seubertii* Nills. var. *espinhacae* Kral & Wanderley (*Irwin et al.* 23667); *X. obcordata* Kral & Wanderley (*Irwin et al.* 27763); *X. itambensis* Kral & Wanderley (*W. R. Anderson et al.* 35879); *X.*

villosicarinata Kral & Wanderley (*Irwin et al.* 19570)], incorrectly assumed to be deposited already at UB, had not yet been sent there. The holotype of *X. pranceana* Kral & Wanderley (*Prance & Silva* 58195) is in place at MG, not at UB as was stated in the publication. Thanks to a thoughtful check by Jacquelyn Kallunki at NY, these errors were caught, the holotypes are being sent to UB, and the correct location for the holotype of *X. pranceana* is now given. The oversight is entirely mine!

—R. Kral, Box 1705, Sta. B, Vanderbilt University, Nashville, Tennessee 37235, U.S.A.
